

ANNA DEMESHKO

Belgrade, Serbia • annademeshko.v@gmail.com • [LinkedIn](#) • [Portfolio](#)

Product Designer with 4+ years of experience designing developer-facing security tools, enterprise B2B products, and complex technical systems. Own the full design cycle from research to developer handoff: user interviews, CJM, user flows, prototyping, UI design, and design systems. Comfortable navigating technical domains, working with engineers daily, and writing code (HTML, CSS, Python) to understand what developers actually experience.

Experience

Product Designer

Remote

Swordfish Security - Russian DevSecOps and application security vendor serving dozens of enterprise clients, including top-10 banks

Sept. 2024 – Mar. 2026

- Designed 5 of the company's 8 enterprise B2B security products, covering complex technical workflows and high-load interfaces
- Owned the end-to-end design process: UX research, user scenario analysis, CJM, user flows, wireframes, interactive prototypes, and UI design
- Built and maintained a design system of 100+ components with Storybook, Taiga UI, and design tokens, reducing screen design time by ~60% and eliminating recurring developer questions on styles and states
- Redesigned core UX of the web app ecosystem, including dashboards, forms, filters, tables, and analytics interfaces, reducing UI-related support requests based on PM feedback
- Translated complex technical and business requirements into clear user scenarios, collaborating with product managers, analysts, and engineers at every stage

UX/UI Designer

Remote

Positron (Grokhotov Studio) - Digital design studio delivering websites and e-commerce products for commercial clients

Jan. 2023 – Dec. 2024

- Designed 15+ commercial digital products, including corporate websites, e-commerce stores, and web services
- Managed up to 4 projects simultaneously, delivering on time and to spec
- Led redesigns based on business goals and user feedback, improving user scenarios and conversion-critical flows
- Created wireframes, mockups, interactive prototypes, and high-fidelity responsive designs
- Developed and maintained design systems, UI kits, and reusable components across projects
- Conducted usability testing and presented design solutions to clients, stakeholders, and development teams

Education

ITMO University

Saint Petersburg

MSc in Information Security Analytics

2022

GPA: 4.90/5

Saint Petersburg State University of Aerospace Instrumentation

Saint Petersburg

BSc in Theoretical and Applied Linguistics

2018

Skills

Design: UX research, usability testing, CJM, user flows, information architecture, interaction design, prototyping, high-fidelity design, design systems, micro-interactions

Tools: Figma (advanced prototyping, organized libraries), Storybook, Jira, Miro, After Effects

Domains: B2B, B2C, SaaS, enterprise, dashboards, analytics interfaces, developer tools

Code & AI: HTML, CSS, Python basics, CSS micro-animations, AI-assisted prototyping and development (Claude, Cursor, ChatGPT, Codex)

Language Skills: English (B2), Russian (native)
